Make Covering Your Sod Simple And Worry Free...

Aero-Kit Industries Inc. and Tarp Technology Innovations have designed a quick and easy roll-up side curtain system trademarked TURFSIDER™. In less than a minute either side of the trailer can be manually opened or closed for side loading or unloading.

Features / Advantages / Benefits

Our side curtains are designed from 20oz. high tensioning PVC material with built in 2" PVC cargo belting welded to the the interior wall on 24" centres, providing added interior protection from loose loads.

Bulkheads

Heavy duty front and rear structural bulkheads are bolted solid to trailer frame.

Top Rail

Heavy Duty galvanized top rail with patent pending floating connection allows system to flex in the field.

T-Bar

The two (2) piece "T" bar support post provides the foundation for the entire roof system. Securely anchored below the floor, TURFSIDER™ ensures structural integrity of the entire system.

Dual Crank System

TURFSIDER'S™ new patent pending floating and off-set arm system allows the smooth manual operation of the entire roll-up side curtain in less than a minute per side. No straps or buckles to untie, simply engage TURFSIDER'S™ auto locking lever and operate the side curtain to gain full side loading access to the trailer.

Travelling Billboard Advertising! "Why Cover Your Load?"

With new MTO regulations for load security, take advantage of more than just providing added protection to your load. Digital print advertising "over the road" is guaranteed to take your company's advertising to the next generation in promoting corporate messaging.
